## DETAILED ACTION

1. **Claims 3, 6, 8 and 9** have been presented for reconsideration based on the Applicants amended claim language and arguments. **Claims 12 and 13** have been presented for Examination.

### Response to Arguments

2. Applicant's arguments presented on 10-18-2004 have been fully considered. The Examiners response is as follows:

2.1 Regarding the Applicants response to the 35 U.S.C. 112 1<sup>st</sup> paragraph rejections of Claims 3, 6, 8 and 9.

Applicant argued,

The present invention violates no laws of thermodynamics. The Examiner has misunderstood the recitation of the term "balanced state" and confused it with the term "balanced ratio." The term "balanced ratio" recognizes that a state exists which is a natural phenomenon. Specifically the claim recites that the balanced ratio is pre-established and corresponds to the critical point in thermodynamic energy (where for water three phases coexist due to a second order phase transition).

The Examiner respectfully traverses Applicants arguments. As disclosed in the previous Office Actions rejections, the term *non-zero error* has no meaning in regards to thermodynamics.

The Examiner has found Applicant's arguments to be unpersuasive and upholds the earlier 35 U.S.C. 112 first paragraph rejections of the claims.

Art Unit: 2123

**2.2** Regarding the Applicant's response to the 35 U.S.C. 112 second paragraph rejections.

The argument is moot because of the Applicants instant amendments.

**Claim Rejections - 35 USC § 112**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

**3. Claims 3, 6, 8, 9, 12 and 13** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

**3.1** In the defining of a balanced state in independent **Claims 6 and 12** the zero error seems to correspond to a mathematical critical point in thermodynamic energy. Such a critical point reasonably is that energy which obeys the laws of thermodynamics, which apparently from all scientific measurements always are obeyed. Thus, as defined, there is always zero error for each node in this simulation. Therefore, there can be no sensing of non-zero error thus making the claims lack in enablement.

**3.2** Dependent **Claims 3, 8, 9 and 13** inherit the enablement flaw of the independent **Claims 6 and 12**.

**Conclusion**

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4.1 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwain M Craig whose telephone number is (571) 272-3710. The examiner can normally be reached on 10:00 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Teska can be reached on (571)272-3716. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
